

As Transit-Oriented Community (TOC) sites with an affordable housing component are brought to open market, the TOC program will require experienced affordable housing providers be part of those development teams to deliver affordable housing services.

The TOC program is looking to engage with established affordable housing providers to gauge their interest in participating in the TOCs.

Affordable housing providers interested in potentially participating in the TOC program may contact Infrastructure Ontario by email at [TOC@infrastructureontario.ca](mailto:TOC@infrastructureontario.ca)
